

## TERMS OF REFERENCE

**Job title:** National Consultant to provide assistance for ensuring the coherence of the national climate and energy policy framework developed in the frame of Republic of Moldova's commitments under UNFCCC and Energy Community Treaty

**Duty Station:** Chisinau, Republic of Moldova

**Reference to the project:** EU4Climate

**Contract type:** Individual Contract (IC)

**Contract duration:** Up to 25 working days in the period May 2021 – July 2021

**Starting date:** May 2021

### 1. BACKGROUND

The goal of EU4Climate Project is to contribute to climate change mitigation & adaptation and the development towards a low-emissions and climate-resilient economy in line with the Paris Agreement<sup>2</sup> in Armenia, Azerbaijan, Belarus, Georgia, Republic of Moldova and Ukraine.

To realize this project goal, the following results should be achieved:

**Result 1:** Finalized or up-dated nationally determined contributions communicated to the UNFCCC;

**Result 2:** Improved inter-institutional awareness and coordination at political and technical level of the Paris Agreement and the corresponding national commitments;

**Result 3:** Established or strengthened MRV systems, with countries getting on track with Paris Agreement transparency requirements;

**Result 4:** Advanced alignment with EU climate acquis as provided by bilateral agreements with EU and in the context of Energy Community Treaty on climate matters that are not covered by the EU4Energy programme;

**Result 5:** Establishment of concrete sectoral guidelines for the implementation of the Paris Agreement in each of the Eastern Partners;

**Result 6:** Increased mobilization of climate finance;

**Result 7:** Enhanced adaptation planning.

The project implementation methodology will follow the logic of the Paris Agreement framework and relevant EU climate acquis, as well as their subsequent developments. The respective climate change EU acquis and climate provisions under the Energy Community treaty will be the integral part of the project logic and implementation methodology, the EU best practices will be shared. Relevant technical guidance on various elements of climate policy development will be used through the capacity building and training activities.

The Paris Agreement on Climate Change was adopted at the UNFCCC Conference of Parties in December 2015 and officially entered into force on 4 November 2016. The Paris Agreement was the first ever universal, legally binding climate deal that set out a plan to put the world on track to avoid dangerous climate change by limiting global warming to “well below 2°C”. Together with Agenda 2030 and the Sendai Framework for Disaster Risk Reduction, the Paris Agreement provides an unprecedented opportunity to create an integrated development approach towards inclusive resilient economies with a zero-carbon footprint by 2100.

The Paris Agreement establishes a new transparency regime, under which countries will have to report progress on reducing GHG emissions and building climate resilience. This transparency regime is currently being established within the UNFCCC framework and its final details are still to be defined. At the same time, the three regional members of the Energy Community (Georgia, Moldova and Ukraine) are encouraged to align their legislation with the EU Monitoring Mechanism Regulation as well as to prepare for the development and adoption of Integrated National Energy and Climate Plans and may soon have to align their legislation with the new EU Energy Union Governance Regulation while the agreement with Armenia equally foresees legal approximation to EU MRV rules. In the past years, significant technical assistance has been provided by the regional ClimaEast project, but countries' capacities for MRV still need further strengthening.

### ***Moldova's context***

The Republic of Moldova's INDC (NDC1) was submitted on 25 September 2015<sup>1</sup>. According to it, the Republic of Moldova intends to achieve an economy-wide unconditional target of reducing its greenhouse gas emissions by 64-67 per cent below its 1990 level in 2030 and to make best efforts to reduce its emissions by 67 per cent. The reduction commitment expressed above could be increased up to 78 per cent below 1990 level conditional to, a global agreement addressing important topics including low-cost financial resources, technology transfer, and technical cooperation, accessible to all at a scale commensurate to the challenge of global climate change. To achieve at the national level the Moldova's NDC targets, the Low emissions development Strategy by 2030 and the Action Plan for its implementation (LEDS 2030) were adopted by the Government<sup>2</sup>. The Strategy plans the low emission development for the following sectors: energy, transport, building, industry, agriculture, forestry and waste.

The decision 1/CP.21 requests those Parties whose intended nationally determined contribution pursuant to decision 1/CP.20 contains a time frame up to 2030 to communicate or update by 2020 these contributions and to do so every five years thereafter pursuant to Article 4, paragraph 9, of the Paris Agreement.

Thus, Ministry of Agriculture, Regional Development and Environment presented, on March 2020, to the Secretariat of the UNFCCC the second Nationally Determined Contribution (NDC2) of the Republic of Moldova<sup>3</sup>. According to it, Republic of Moldova intends to achieve more ambitious targets than in its NDC1. The country's new economy-wide unconditional target is to reduce its greenhouse gas emissions by 70 per cent below its 1990 level in 2030, instead of 64-67 per cent as committed in NDC1. As to the new economy-wide conditional target, instead of 78 per cent as committed in NDC1, the reduction commitment expressed above could be increased in NDC2 up to 88 per cent below 1990 level, provided a global agreement addressing important topics including low-cost financial resources, technology transfer, and technical cooperation, accessible to all at a scale commensurate to the challenge of global climate change, is insured. The Republic of Moldova has included in its updated NDC the adaptation component in line with Articles 2.1 and 7.1 of the Paris Agreement and Katowice Rulebook (COP 24). According to it, the adaptation priority sectors are agriculture, water resources, forestry, human health, transport and energy. Further, the LEDS 2030 needs to be updated. This activity is undertaken with the support of the EU4Climate project and is planned that the updated LEDS 2030 will be delivered by Q2, 2021.

According to Moldova's National Inventory Report 1990-2016 (sources of data used in quantifying the reference points for Moldova's Updated NDC), in 2016, about 72.7 per cent of the national net direct GHG

---

<sup>2</sup> [https://www.legis.md/cautare/getResults?doc\\_id=98493&lang=ro](https://www.legis.md/cautare/getResults?doc_id=98493&lang=ro)

3

[https://www4.unfccc.int/sites/ndcstaging/PublishedDocuments/Republic%20of%20Moldova%20First/MD\\_Update\\_NDC\\_final\\_version\\_EN.pdf](https://www4.unfccc.int/sites/ndcstaging/PublishedDocuments/Republic%20of%20Moldova%20First/MD_Update_NDC_final_version_EN.pdf)

emissions originated from the Energy Sector, being the most important source of total national direct GHG emissions. Other relevant direct GHG sources were represented by Agriculture Sector (17.8 per cent of the total), Waste Sector (10.7 per cent of the total) and IPPU Sector (5.6 per cent of the total).

Moldova's LEDS 2030 establishes a GHG reduction target from the energy sector of 74% as unconditional scenario and 82% conditioned, compared to 1990. Thus, the energy sector is the one with the most ambitious GHG reduction targets. Achieving this target demands climate change mainstreaming into development policies, plans and programmes.

According to LEDS 2030, Moldova identified energy as a key sector for implementation of its NDC1. The enhancement of energy efficiency across key economic sectors, the adoption of clean energy technologies and shifting to renewable energies to decrease dependence on imported fossil fuels is part of the NDC and LEDS 2030. NDC2 also identify increased access energy as a means of adaptation and vulnerability reduction.

Republic of Moldova adhered to the Energy Community Treaty in 2009 (Law No. 117 as of 23.12.2009 on adherence of the Republic of Moldova to the Energy Community Treaty)<sup>4</sup>. According to it, Republic of Moldova is subject to all the obligations imposed on the Parties by the Treaty, by all decisions and procedural acts adopted in the context of the application of the Treaty.

The Energy Community Ministerial Council adopted the Recommendation 2018/11/IMC-EnG on preparing for the development of integrated national energy and climate plans by the Contracting Parties of the Energy Community. The Recommendation adopted is not legally binding, therefore does not impose obligations on Contracting Parties and it does not establish any deadline. However, as indicated in Article 5 of the Recommendation, the preparation of national plans should be an iterative and dynamic process starting in 2018. The Policy Guidelines (PG 03/2018) on the development of NECPs state that these integrated national plans should cover the period from 2021 to 2030 and lay down the pathway to achieve targets set for 2030 regarding the increase of renewable energy in overall energy consumption, increased energy efficiency and reduction of greenhouse gas emissions. Further, the NECPs should also include a perspective until 2050 in order to ensure consistency with long-term relevant policy objectives at EU, UNFCCC and Energy Community level. According to the Policy Guidelines, Contracting Parties are requested to submit their final NECPs to the Secretariat by the end of 2020. European legislative base for the elaboration of the NECP is the Regulation (EU) 2018/1999 of the European Parliament and of the Council of 11 December 2018 on the Governance of the Energy Union and Climate Action<sup>5</sup>. At the national level, in the Republic of Moldova, leading institution for this process is Ministry of Economy and Infrastructure (MEI). MEI benefits from the EU funded project "Support to the modernization of the energy sector on the Republic of Moldova (STARS)", which helps the Government of the Republic of Moldova with experts' consultation for developing its NECP.

By now, several climate and energy related planning processes are in place or are under development, namely:

- (1) Development and submission of the NDC. Moldova developed and presented to the UNFCCC Secretariat its first INDC in September 2015. This become NDC upon ratification of the Paris Agreement by the Republic of Moldova<sup>6</sup>. The decision 1/CP.21 requests those Parties whose intended nationally determined contribution pursuant to decision 1/CP.20 contains a time frame up to 2030 to communicate or update by 2020 these contributions and to do so every five years thereafter pursuant to Article 4, paragraph 9, of the Paris Agreement. Thus,

<sup>5</sup> [https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=uriserv:OJ.L\\_.2018.328.01.0001.01.ENG&toc=OJ:L:2018:328:FULL](https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=uriserv:OJ.L_.2018.328.01.0001.01.ENG&toc=OJ:L:2018:328:FULL)

<sup>6</sup> Law #78/2017 on ratification of the Paris Agreement - [https://www.legis.md/cautare/getResults?doc\\_id=99251&lang=ro](https://www.legis.md/cautare/getResults?doc_id=99251&lang=ro)

2020 year marked the five-year point at which countries were to step up their climate ambitions by updating its NDCs. Republic of Moldova, with the support of the EU4Climate project, succeeded in updating its NDC and it has been submitted to the UNFCCC secretariat in March 2020, being the fourth country in the world, which has presented the 2<sup>nd</sup> Nationally Determined Contribution to the Paris Climate Agreement.

- (2) Development of the Low Emission Development Strategy for 2030 period (LEDS 2030). This is a mid-term planning policy document, which was adopted in December 2016. LEDS 2030 and its action plan are considered as an instrument for the NDC's targets implementation at the national level. Thus, LEDS 2030 adopted in 2016 "transposed" at national level Moldova's NDC targets under the Paris Agreement. Its Action Plan establish the activities by which the reduction targets will be achieved. After the submission of the updated NDC, MARDE is reviewing the LEDS 2030 and its action plan, in order to plan the achievement of the more ambitious targets assumed by Moldova under the Paris Agreement. This activity is supported by EU4Climate project and it is envisaged that the draft of the updated LEDS 2030 is to be delivered by the Q2, 2021. Thus, it can be expected that the updated LEDS 2030 will be approved by the Government within the period Q4, 2021 – Q2, 2022. It may be considered that the LEDS will be updated with a regularity of 5 years as the NDC.
- (3) Climate Change Adaptation Strategy for 2020 period and its action plan<sup>7</sup>, which has the aim to ensure a social and economic development of the Republic of Moldova less vulnerable to the impact of climate change, becoming more and more resilient and the overall objective to increase the capacity of the Republic of Moldova to adapt and respond to the real or potential effects of climate change. With the support of the project "NAP-2: Advancing Moldova's National Climate Change Adaptation Planning" (GCF funded and implemented by UNDP) the second iteration of the Climate Change Adaptation Strategy is developed.
- (4) Long Term Strategy for Low Emissions Development, which preparation and communications is required by the Paris Agreement, and subsequent decisions of the Conference of Parties to the UNFCCC. According to the Governmental Action Plan for 2020-2023, LT LEDS is planned to be developed and approved by the Government in Q4, 2022. Within the EU4Climate project a vision for 2050 low emissions development of Moldova was developed.
- (5) Energy Strategy for the period 2030<sup>8</sup>, which reflects the country's priority problems, which require rapid solutions and a resizing of objectives in line with the need to achieve an optimal balance between internal resources (both currently used and projected) and the country's urgent needs, the objectives of the European Union and of the Energy Community and national targets, international obligations regarding treaties, agreements and programs (including the neighborhood policy) of which the Republic of Moldova is a member. The main objectives of the strategic document are: security of energy supply; creation of competitive markets and their regional and European integration; environmental sustainability and combating climate change.
- (6) The national action plan on energy from renewable sources for the years 2013-2020<sup>9</sup> the purpose of which refers to the efficiency of energy consumption and the reduction of greenhouse gas emissions.
- (7) National Energy and Climate Plan (NECP), which is under development with the support of EU funded STARS project. It addresses 5 dimensions (Energy Security, Internal Energy Market, Energy Efficiency, Decarbonisation, Research, Innovation and Competitiveness) of the Energy Union. The NECP is a tool for the implementation of the Energy Union Strategy and for the development of more strategic energy and climate policy planning. By now, experts are assisting Ministry of Economy and Infrastructure in the development of the following dimensions: energy security, internal energy market, energy efficiency and RES (part of Decarbonisation dimension).

---

<sup>7</sup> Governmental Decision 1009/2014 [https://www.legis.md/cautare/getResults?doc\\_id=49220&lang=ro](https://www.legis.md/cautare/getResults?doc_id=49220&lang=ro)

<sup>8</sup> Governmental Decision 102/2013 - [https://www.legis.md/cautare/getResults?doc\\_id=68103&lang=ro](https://www.legis.md/cautare/getResults?doc_id=68103&lang=ro)

<sup>9</sup> Governmental Decision #113.2013 [https://www.legis.md/cautare/getResults?doc\\_id=47102&lang=ro](https://www.legis.md/cautare/getResults?doc_id=47102&lang=ro)

(8) Other strategical documents.

Reporting of GHG emissions' instruments are regulated by the Governmental Decision No. 1277 as of 26.12.2018 on the Establishment and Functioning of the National System for Monitoring and Reporting Greenhouse Gas Emissions and other Information Relevant to Climate Change<sup>10</sup>, which transposed into the national legislation the Regulation (EU) No 525/2013 of the European Parliament and of the Council of 21 May 2013 on a mechanism for monitoring and reporting greenhouse gas emissions and for reporting other information at national and Union level relevant to climate change. The reporting instruments are following: National GHG Inventory, BUR, and National Communications. With the support of the EU4Climate project the GH#1277/2013 is reviewed as per the requirements of the Enhanced Transparency Framework of the Paris Agreement, specifically focusing on following the modalities, procedures and guidelines of the Article 13 of the Paris Agreement.

It is worth to mention the National Committee for Climate Change, established under the climate change coordination mechanism<sup>11</sup>. The National Commission is an inter-institutional body established for the purpose of coordinating and promoting the measures and actions necessary for the unitary application on the territory of the Republic of Moldova of the provisions of the UNFCCC and of the Paris Agreement. The National Commission provide the institutional coordination framework for monitoring, reporting and verification, as well as for facilitating the integration of climate change issues into national and sectoral programs and plans.

Currently, there are two main climate and energy planning document which are under development/updating:

- LEDS 2030 updating based on NDC2 established more ambitious GHG emissions reduction targets, which is developed with the support of EU4Climate project, and
- NECP development with the support of EU funded project "Support to the modernization of the energy sector on the Republic of Moldova (STARS project)". Development process is leaded by the MoEI.

The support of the STARS project is dedicated for following dimensions of the NECP: Energy Security, Internal Energy Market, Energy Efficiency and use of RES (as part of Decarbonisation dimensions). For planning of the Energy Dimension, MEI is using the results of TIMES modeling by 2050. Decarbonisation (excepting "use of RES"), Research, Innovation and Competitiveness dimensions are not covered by the STARS project support. An inter-institutional Working group will be established under this work.

Currently, there is an overlapping of the climate and energy planning processes, especially those related to the LEDS 2030 and the NECP's Decarbonisation dimension. Apparently, LEDS can be treated as Decarbonisation dimension of the NECP. Thus, the LEDS 2030 content can be used as a direct input to the Decarbonisation dimension of the NECP, given significant content and objective overlaps. According to the communication with MEI representatives, due to different methodologies applied, the GHG emission reduction targets for energy sector established in updated NDC and updated LEDS 2030 are different from those calculated for and to be established in the NECP (less ambitious). If this situation will be accepted and different targets will be established for the same sector, Republic of Moldova would have two national planning documents which plan in a different way the energy sector. More than this, targets will derogate from general target established in the Moldova's updated NDC. It is worth to be mentioned, newly approved Governmental Decision on the planning, development, approval, implementation, monitoring

---

<sup>10</sup> [https://www.legis.md/cautare/getResults?doc\\_id=112485&lang=ro](https://www.legis.md/cautare/getResults?doc_id=112485&lang=ro)

<sup>11</sup> Governmental Decision #444/2020 [https://www.legis.md/cautare/getResults?doc\\_id=122314&lang=ro](https://www.legis.md/cautare/getResults?doc_id=122314&lang=ro)

and evaluation of the public policies documents<sup>12</sup> states that one of the elaboration stage of a new policy document is identification of public policy documents in the process of implementation or completed that contain provisions related to the field or sub-domains of activity, in order to ensure the continuity and synergy of interventions and to avoid duplications and opposable provisions.

## 2. OBJECTIVE OF THE ASSIGNMENT AND EXPECTED OUTPUTS

The objective of the assignment is to ensure the coherence of the national climate and energy policy framework developed in the frame of Republic of Moldova's commitments under UNFCCC and Energy Community Treaty, by considering the GHG emission reduction targets established in the Moldova's updated NDC.

The UNDP Moldova and the Ministry of Agriculture, Regional Development and Environmental requires the services of the national consultant to complete the following tasks (list not exhaustive):

- a) facilitate inter-institutional dialog between MARDE and MEI in the processes of updating LEDS 2030 and NECP development;
- b) assist representative of MARDE during the participation within the Inter-institutional Working Group meetings, as well as during the meetings with international organizations (e.g. Energy Community, European Commission, other) in order to ensure the prioritization of the GHG emission reduction targets set in the updated NDC;
- c) interlink the activities of the teams assigned with LEDS 2030 updating and NECP development and ensure their coherence by organizing common meetings, facilitate the discussions, drawing and tracking conclusions, etc ;
- d) provide practical recommendations for liaison and alignment of the GHG emission reduction targets established for the energy sector in updated NDC/LEDS2030 and NECP;
- e) conduct consultations of the recommendations with stakeholders in order to identify the optimal solution for alignment of GHG emission reduction targets acceptable by both Ministries.

## 3. KEY DELIVERABLES AND TIMEFRAME

The national consultant is expected to deliver the following deliverables per below identified timeline:

| Key Deliverables and the Anticipated Workload  | Tentative Timetable/Deadline |
|--|------------------------------|
| <b>Deliverable 1:</b> A detailed Work Plan and Implementation Schedule                     | By end May 2021              |
| <b>Deliverable 2:</b> First report on undertaken work as per tasks a)-d)                   | By mid-June 2021             |
| <b>Deliverable 3:</b> The consultation workshop as per task e)                             | By mid-June 2021             |
| <b>Deliverable 4:</b> The final report on the execution of the Objective of the assignment | By mid-July 2021             |

**Note:** Deliverables and final timeline can be amended or specified for the purpose of the assignment.

## 5. INSTITUTIONAL ARRANGEMENTS

This is a part-time consultancy. The timeframe for the work of the national consultant is planned for May – July 2021. The national consultant will work under direct supervision of the EU4Climate Project's National Coordinator and in close collaboration with the Air and Climate Change Section of the Ministry of Agriculture, Regional Development and Environment and Energy Department of the Ministry of Economy and Infrastructure, so that the final product reflects their comments. UNDP will provide administrative and logistical support in organization of the consultative workshop.

<sup>12</sup> Governmental Decision #386/2020 [https://www.legis.md/cautare/getResults?doc\\_id=121921&lang=ro](https://www.legis.md/cautare/getResults?doc_id=121921&lang=ro)

## **6. FINANCIAL ARRANGEMENTS**

The financial proposal, to be submitted in USD, should specify a fee per day and the total requested amount, including all related costs (e.g. fees, per diems, travel costs, etc.). Payment will be provided in one tranche, after the completion of all planned activities and certification by the EU4Climate Project's National Coordinator that the services have been satisfactorily performed, i.e. in July 2021.

## **7. SKILLS AND EXPERIENCE REQUIRED**

### **I. Education:**

- Master's degree or equivalent in Environmental Engineering, Environmental Management, Energy, Climate Change Policies Development and Strategic Planning or other related fields is required.

### **II. Experience:**

- At least 5 years of experience in climate change and/or energy sectors;
- At least 3 years of working experience in the institutional consultancy on energy and/or climate change related issues;
- Experience of work within UNDP, UNEP, WB and/or EU-funded project or other international organization would be an asset.

### **III. Competencies:**

- Strong knowledge of Moldova's climate and energy related commitments under the UNFCCC, Paris Agreement, Association Agreement RM-EU and Energy Community Treaty;
- Strong analytical and negotiating skills demonstrated by previous assignments;
- Strong interpersonal and communication skills (verbal and written), demonstrated by previous assignments;
- Fluency in English and Romanian languages.

The UNDP Moldova is committed to workforce diversity. Women, persons with disabilities, Roma and other ethnic or religious minorities, persons living with HIV, as well as refugees and other non-citizens legally entitled to work in the Republic of Moldova, are particularly encouraged to apply.

## **8. PERFORMANCE EVALUATION**

Contractors' performance will be evaluated against timeliness, responsibility, initiative, creativity, communication, accuracy, and overall quality of the delivered products.

## **9. DOCUMENTS TO BE INCLUDED WHEN SUBMITTING THE PROPOSALS**

Interested individual consultants must submit the following documents/information to demonstrate their qualifications:

1. Proposal, explaining why he/she is most suitable for the work, including past experience in similar assignments, providing a brief information on above qualifications and methodology on how he/she will approach and conduct the work (if applicable).
2. [\*\*OFFEROR'S LETTER TO UNDP CONFIRMING INTEREST AND AVAILABILITY FOR THE INDIVIDUAL CONTRACTOR \(IC\) ASSIGNMENT\*\*](#)
3. CV and/or the duly filled in and signed Personal History Form (P11), and at least three names for a reference check.
