

## TERMS OF REFERENCE

<b>Job title:</b>	<b>National Legal Consultant to support introducing of climate services into the legal framework</b>
<b>Type of Contract:</b>	<b>Individual Contract (IC)</b>
<b>Duty station:</b>	<b>Home-based</b>
<b>Section/Unit:</b>	<b>Environment, Energy and Climate Change Cluster</b>
<b>Languages requirement:</b>	<b>English and Romanian (Russian is an asset)</b>
<b>Contract Duration:</b>	<b>June 2022 – October 2022, 50 working days</b>
<b>Payment arrangements:</b>	<b>Lump sum contract (payments linked to satisfactory performance and delivery of outputs)</b>
<b>Evaluation method:</b>	<b>Interview of shortlisted candidates</b>

### I. BACKGROUND

Climate change is already profoundly impacting the conditions for resource availability and agricultural activities. Over the last decade, the country has experienced several extreme events, such as droughts and major floods, along with the cumulative effects caused by increased mean temperature and the uneven distribution of precipitation throughout the year, which have had negative consequences on the country's economy, and its population wellbeing and health. Severe droughts are recurring more frequently, causing significant economic losses. The increasing scope and intensity of extreme events have also resulted in increased frequencies of high-risk situations. By 2050, an increase of 2–3°C in the average temperature, an additional 32 days that exceed the current maximum temperature by 10%, and another 12 days with zero precipitation are projected.

The Government sees the National Adaptation Planning (NAP) process as key to achieving the adaptation objectives outlined in its 2014 Climate Change Adaptation Strategy of the Republic of Moldova and its 2020 Nationally Determined Contributions (NDC), as well as the continued mainstreaming of climate change considerations into its policies and budgeting processes. The proposed project supports the Republic of Moldova's Government in advancing the second cycle of its National Adaptation Planning process (known as NAP-2). The outcomes of the NAP-2 national adaptation planning processes are:

- **Outcome 1:** To strengthen and operationalize the national steering mechanism for climate change adaptation (CCA);

- **Outcome 2:** To improve the long-term capacity on planning and implementation of adaptation actions through CCA technologies;
- **Outcome 3:** To improve the mainstreaming of climate change adaptation through the increased alignment of national development priorities in the priority sectors (forestry, health, energy, and transport).

The project will contribute to UNDAF, 2018-2022 outcome #3 (The people of Moldova, especially the most vulnerable, benefit from enhanced environmental governance, energy security, sustainable management of natural resources, climate, and disaster-resilient development). Additionally, the project will contribute to the UNDP Country Programme Output 3.3 (National and sub-national governments have improved capacities to integrate resilience to climate change and disasters into development plans and practices to reduce population's vulnerability). Other than that, the project will contribute to the National Development Strategy "Moldova 2030" by ensuring resilience to climate change by reducing risks related to climate change and by facilitating adaptation in six priority sectors - agriculture, water resources, health, forestry, energy, and transport.

The preliminary work under the first cycle of the NAP (known as NAP-1) supported developing a NAP as a process, conceptualizing, and developing its elements, including the national steering mechanism, and laid down the groundwork towards long-term adaptation planning. Despite the progress, significant gaps remain in integrating climate change considerations into many of the national priority sectors' development policies and their associated budget priorities. National appropriations for CCA remain limited.

The NAP-2 goals will be achieved within two parallel implementation tracks. The first track implemented by UNDP expands and deepens the national approach developed under the NAP-1 and strengthens synergies both vertically, at different levels of the governance, and horizontally, between the sectors affected by climate change to reduce duplication of efforts, pool scarce resources for efficient use, and ensure a coherent and comprehensive approach to the integration of CCA responses into development planning. In contrast, the second track will focus on adaptation in the agriculture sector and will be concurrently implemented under FAO's auspices.

The National Designated Authority has coordinated with the UNDP and the FAO country offices to ensure the complementarity and congruency of the activities and exchange, as appropriate. By its very nature, the NAP-2 will facilitate the integration of CCA into existing strategies, policies, and programs and establish a strong foundation for the integration of methods, tools, and information systems in day-to-day planning activities to inform decision-makers on the climate risks effectively and to enable the informed formulation of resilient projects and financing strategies.

Statistical analyses show that the loss of life and property caused by hydrometeorological disasters has increased in recent decades. It is also reported that the frequency and severity of the weather, climate, and water-related hazards causing disasters have been increasing due to climate change. The losses from hydrometeorological and climate disasters can be prevented or mitigated by predicting severe weather and climate conditions causing disasters by issuing early warnings for decision-makers, disaster managers, and the public at large.

Furthermore, it must be considered that the assessment of the meteorological, hydrological, and climate data, products, and services, particularly long-term climate statistics, as the decisive criteria for all sectoral planning and applications will provide extreme contribution for risk reduction, increasing the structural and social resilience against disasters, and sustainable development of the country.

It is obvious that the service delivery capacity of the State Hydrometeorological Service (SHS) must be improved by making necessary investments in human resources, technological infrastructure, and research capabilities in order to ensure the provision of required products and services for the public and private

sectors, and for the wellbeing of whole Moldovan community. Obviously, no improvement could occur without strong legal and policy framework.

## **II.OBJECTIVES AND EXPECTED DELIVERABLES OF THE ASSIGNMENT**

This assignment's main objective is to enhance State Hydrometeorological Service legal competencies by integration of climate services into the existing legislative and regulatory framework (the Governmental decision nr. 330/2006 on Approval the list for the services provided free of charge and against payment by the State Hydrometeorological Service and of the modality of use of the special means of the State Hydrometeorological Service.).

### **Specific tasks:**

The National Consultant will support national authorities to integrate the climate services into the relevant legal and regulatory frameworks. He/she will work closely with the project team, representatives of State Hydrometeorological Service, Ministry of Environment and the other relevant stakeholders. The specific tasks are presented below:

- Review of existing relevant legislative and regulatory framework on hydrometeorological activity, familiarize with the relevant documents and studies in the area, including existing Governmental decision nr. 330/2006 on Approval the list for the services provided free of charge and against payment by the State Hydrometeorological Service and of the modality of use of the special means of the State Hydrometeorological Service;
- Identify entry points for introducing new climate services into the new or updated legal and regulatory frameworks;
- Prepare legal documents to support the elaboration of the reviewed Governmental decision, including drafting together with the representatives of the State Hydrometeorological Service documents that are supporting the law-making process: analyse ex-ante; concept of the legal act;
- Participate in the sessions of the Working group established for the development of the legal document;
- Draft the required documents for the Governmental Decision on the services provided by SHS according to the provisions of Law no. 100/2017 on normative acts and ensure the transparency of the decision-making process and approval procedure;
- Participate in workshops, meetings and visits together with the representative of the State Hydrometeorological Service to present, and collect feedback from relevant stakeholders;
- In consultation with the State Hydrometeorological Service prepare Draft Regulatory Impact Assessment (RIA) under the national procedure for developing normative acts;
- In consultation with the State Hydrometeorological Service prepare a draft of the information note under the national procedure for developing normative acts;
- Participate in the sessions of the Working group established for the development of the legal document;
- Process feedback from stakeholders, develop the Table of Concordance and the adjusted version of the developed documents;
- Prepare a final report on the implementation of the assignment.

No	Deliverables	Timeframe
1.	Initial set for launching the legal document-making process (ex-ante analysis, scientific study) developed	June 2022 5 w.d.
2.	Report on initial consultations with the relevant stakeholders and the Concept of the Governmental Decision developed	June 2022 7 w.d.
3.	The Draft Governmental Decision as well as the supporting documents: Information Note, Regulatory Impact Assessment, developed and consulted with relevant stakeholders	August 2022 16 w.d.
4.	Report on collected feedback from stakeholder consultations of the Governmental Decision submitted	September 2022 5 w.d.
5.	Table of Concordance developed based on feedback collected, Governmental Decision adjusted and send for approval	October 2022 7 w.d.
6.	Final version of the Governmental Decision developed	October 2022 8 w.d.
7.	Final report on the implementation of assignment	October 2022 2 w.d.

This is a part-time consultancy. The timeframe for the work is planned for June 2022 - October 2022.

#### **Management Arrangements:**

The Consultant will work in cooperation with the Team Leaders and under the supervision of the Project Manager. The Project Manager should approve the Deliverables.

### **III. REQUIREMENTS FOR EXPERIENCE AND QUALIFICATION**

#### **Academic Qualification:**

- University degree in Law.

#### **Experience:**

- At least 4 years of working experience in developing/contributing to legislative, normative, and regulatory frameworks in accordance with the national methodology and consultations/reviewing process;
- At least 3 legal acts, regulations, or similar documents in the environment and climate change fields drafted;
- Experience of work with international organizations and in international projects will be an asset.

#### **Competencies:**

- Knowledge of the national climate-related legal and policy framework;
- Knowledge of national methodology for developing legislative, normative, and regulatory frameworks;
- Demonstrates excellent organizational skills and a proven ability for multi-disciplinary analysis;
- Excellent writing, presentation, public facilitation skills.

**Language requirements:**

- Fluency in Romanian is required for this assignment; knowledge of English and Russian will be an advantage.

Proven commitment to the core values of the United Nations, in particular, respecting differences of culture, gender, religion, ethnicity, nationality, language, age, HIV status, disability, and sexual orientation, or other status. Please mention in CV if you belong to the group(s) under-represented in the UN Moldova and/or the area of assignment.

UNDP Moldova is committed to workforce diversity. Women, persons with disabilities, Roma and other ethnic or religious minorities, persons living with HIV, as well as refugees and other non-citizens legally entitled to work in the Republic of Moldova, are particularly encouraged to apply.

**IV. PAYMENT MODALITIES**

Payment to the individual contractor will be made based on deliverables performed and accepted, and upon certification of satisfactory completion by the project manager.

**V. APPLICATION PROCESS**

Applicants shall submit the following documents:

- ☒ Offeror's Letter confirming Interest and Availability, including financial offer, according to Annex 2;
- ☒ CV, including information about experience in similar assignments;
- ☒ Brief description of why the individual considers him/herself the most suitable for the assignment.

Incomplete applications will not be considered.

**Important notice:**

The applicants who have the statute of Government Official / Public Servant before the appointment will be asked to submit the following documentation:

- a no-objection letter in respect of the applicant received from the Government, and;
- the applicant is certified in writing by the Government to be on official leave without pay for the individual contract's entire duration.

A retired government official is not considered, in this case, a government official, and as such, may be contracted.

**VI. ANNEXES TO THE TOR**

Annex 1 - Individual Consultant General Terms and Conditions

Annex 2 - Offeror's Letter confirming Interest and Availability including the financial proposal
