Title: Updating the Flood Risk Management Plans (FRMP) for the Dniester River Basin and the Danube-Prut and Black Sea River Basin Districts

Project: “Supporting the Moldovan authorities in the sustainable management of the Dniester River” Project/Dniester 2

1. BACKGROUND

Sustainable management of water resources in accordance with the principle of integrated water management is a priority for Moldova. For further development of the water policy and improvement of the regulatory framework, the Ministry of Environment (MoE), with the support of its subordinated institutions, is responsible for ensuring an ongoing dialogue with the neighbouring countries on the integrated management of transboundary water resources, with the goal to ensure the quality and quantity of water needed for both sustainable socio-economic development of the country and a healthy environment.

In the process of improvement of the national regulatory framework, and harmonization of the environmental legislation with the provisions of European Union (EU) directives, the national environmental protection system faces many constraints, particularly, related to outdated standards, normative acts, capacity of responsible institutions, shortage of qualified staff in the government sectoral institutes, etc.

The Overall Objective of the “Supporting the Moldovan authorities in the sustainable management of the Dniester River” Project/Dniester 2 is to increase the capacity of the Moldovan Government to sustainably manage the Dniester River basin at the national and transboundary levels, including:

- To ensure that Moldova has a sufficient regulatory framework for sustainable river management based on the basin-wide approach supported by the WFD provisions,
- To provide the Moldova Government
- with a comprehensive and realistic Management Plan for the Dniester River Basin developed in compliance with the WFD,
- To provide continuous support for the enhancement of capacities of national authorities responsible for water management, as well as the Moldovan representatives under joint Moldovan and Ukrainian bodies tasked with cross-border management of the Dniester River
- To improve the social, economic, and environmental conditions of the Dniester River.

The project duration is from August 2022 through August 2026.

2. OBJECTIVES AND APPROACH OF THE ASSIGNMENT

The Flood Risk Management is governed by the Water Law No. 272/2011 (Article 49), Regulation on Flood Risk Management approved by Government Decision No. 887/2013, and the Concept for Reforming the National System for Managing, Preventing, and Mitigating Flood Consequences, approved by Government Decision No. 590/2018.

The Flood Risk Management Plans (FRMP) for the Dniester River Basin District and the Danube-Prut and Black Sea River Basin District were approved by Government Decision No. 562 of 31 July 2020.

FRMPs outline the district's diverse geological, hydrological, and climatic conditions, emphasizing the significant risk of flooding due to its landscape and infrastructure. The plan addresses surface and groundwater resources, soil types, and biodiversity, highlighting the role of natural and artificial reservoirs in flood control. It reviews historical floods and the impact of dams and levees, noting the deterioration of protective infrastructure. The plan also presents objectives and measures for flood risk reduction, including structural improvements and institutional capacity building. The FRMPs includes a mix of structural and non-structural measures to mitigate flood risks during the years 2020-2025. Structural measures include reinforcing and maintaining dams and levees, dredging rivers, constructing new flood protection infrastructure, and improving existing drainage systems. Non-structural measures focus on establishment of early warning systems, updating flood risk maps, implementing land-use regulations, and conducting public awareness campaigns. The plan also emphasizes institutional capacity building, cross-border cooperation, and updating legislative and regulatory frameworks to ensure effective flood management.

The implementation period for the measures outlined in current FRMPs is set to expire in 2025. To ensure the continued effectiveness and compliance of flood risk management efforts, an update of the FRMPs is required.

The **primary objective of this assignment** is to update the FRMPs for the Dniester River and the Danube-Prut and Black Sea River basin districts, ensuring their compliance with relevant national and EU legislation, as well as their alignment with current hydrological data, risk assessments, latest technical and scientific knowledge and best practices in flood risk management.

The FRMPs shall be updated in close coordination with Public National Administration Apele Moldovei, the Ministry of Environment, local public authorities, local administrations, and other relevant stakeholders.

3. TASKS TO BE PERFORMED UNDER THE ASSIGNMENT

To reach the proposed objectives, the tasks of the assignment will be organized as follows:

1. Review and Analysis of Existing Plans and Data Collection

- Assess the current Flood Risk Management Plans (FRMPs) approved by Government Decision No. 562 of 31 July 2020, along with the annual progress reports prepared by the Ministry of Environment through the Public National Administration Apele Moldovei.
- Identify and analyse the synergistic aspects between River Basin District Management Plans (RBDMPs) and FRMPs, focusing on areas of overlap, mutual benefits, and opportunities for integrated water management. Highlight how coordinated planning can enhance water resource sustainability and flood resilience.
- Review available hydrological and meteorological data, flood hazard and risk maps, and relevant studies conducted since the approval of the existing plans as well as socio-economic data relevant to flood risk management.
- Identify new or emerging flood risks based on recent events and the latest data.
- Engage with the Apele Moldovei Public Administration, other relevant institutions, stakeholders, and individual experts, including those from the left riverbank, to collect insights and additional data.

2. Updating the FRMPs for the Dniester River Basin District and the Danube-Prut and Black Sea River Basin District

- Update as required the general presentation of districts, preliminary flood risk assessment, flood risk management objectives, proposed measures and their prioritization.
- Prepare the first draft of the updated FRMPs in accordance with the Regulation on Flood Risk Management, approved by Government Decision No. 887/2013, and, to the extent possible, align it further in accordance with the provisions of Directive 2007/60/EC of the European Parliament and of the Council of 23 October 2007 on the assessment and management of flood risks taking into consideration the environmental objectives set in the Dniester and Danube-Prut and Black Sea RBDMPs

3. Legal Assistance and Support for Public Consultations and Official Endorsement of Updated FRMPs

- Draft the Explanatory Note and a Government Decision for the approval of updated FRMPs, in line with the provisions of Law No. 100/2017 on normative acts.
- Conduct public consultations on the updated FRMPs, including consultations at the local level.
- Assist in the process of official endorsements for the draft Government Decision approving the updated FRMPs.
- Finalise the Government Decision, Explanatory Note, and updated FRMPs based on public feedback and official endorsement outcomes.
