SECTION 5. TERMS OF REFERENCE

1. Background Information and Rationale, Project Description

On 23rd of June 2022, the European Council granted the Republic of Moldova the status of EU candidate country which is a substantial achievement, but which comes with great responsibilities and obligations. One of such obligations is the “Green Agenda and Sustainable Connectivity” which includes Chapters of the environment and climate change acquis. In this sense, meaningful reform is expected in view of European Green Deal targets.

The Green Transition Project takes due account of this endeavor. Hence, it will put in place the enabling conditions for a green transformation in Moldova through a combination of cross-sectorial decision-making in joint stakeholder platforms, capacity building measures, general education and awareness raising, dissemination of best policy practices, information sharing and networking, as well as pilot-testing green-transition related solutions and other activities, to ensure that the green transition concept is well understood and implemented.

The established enabling conditions and the investments into green-transition solutions will respond to the key development challenges that the country is currently dealing with such as climate change, environmental pollution, and the energy crisis.

It is well acknowledged that Moldova is highly vulnerable to climate change, given the limited resources and institutional capacities to address the climate change impacts. It is also due to the heavy reliance on the agricultural sector, water scarcity and other geographical factors. Currently the country is advancing with the national adaptation planning, including in the agricultural sector, aimed at putting in place proper institutional, technical, and budgeting capacities in the context of climate change, however significant gaps remain in embarking of the sectors into achievement of the long-term adaptation targets.

Environmental degradation is also posing a major threat to Moldova’s development agenda as its economy relies greatly on natural resources which leads to their overexploitation and pollution. Inadequate waste management practices and outdated practices and technologies in the key sectors of the economy also contribute to environmental degradation and pollution. Mainstreaming of the green agenda into the country’s economic activities is taking place slowly.

Moldova is in line with the global trend of continuously growing urbanization, with the proportion of the population living in urban areas expected to rise from 47% in 2010 to 60% in 2030 (UN Habitat). Cities are increasingly and significantly contributing to the main drivers of global environmental degradation. The municipalities have the greatest impact on air quality and are responsible for more than 50% of total air pollution in Moldova.

From energy security perspective – Moldova is highly dependent on imported energy sources and rely mostly on the use of fossil fuels. In addition, inefficient energy supply and consumption across all sectors exacerbates the situation. Until recently being 100% dependent on Russian gas import, the country is actively seeking diversification of energy supplies after the war of aggression in Ukraine. Improvements both in energy efficiency and in the development of domestic resources – including renewable energy resources – for strengthened sustainability, competitiveness, and energy security rank high on the political agenda. Energy sector and also the main source of GHG emissions in the country.

Against this background, the Green Transition Project aims to support the Government of Moldova to engage sustainably in a transformative green agenda by enhancing awareness, building capacities, and encouraging investments into low-emission and resource efficient economy. **A key cross-cutting priority is the integration of gender equality to ensure that the green transition benefits all segments of society equitably.**

The target areas of the project are resource efficiency, green and circular economy, cleaner and sustainable energy, and mobility.

The Project is be implemented under the following three specific components:

1. Socio-economic framework for a gender-responsive and inclusive green transition enabled.
2. Capacity and awareness on the inclusive green transition increased among key stakeholders.

3. Additional funding attracted by promoting and piloting investments in green and innovative technologies, while evidence-based decision-making for green transition is improved by deploying a reliable air quality monitoring system.

Gender Integration Strategy:

The project will apply a gender lens across all activities to:

- Ensure equal participation of women and men in decision-making processes.
- Address gender-specific barriers to accessing green jobs, technologies, and finance.
- Promote gender-sensitive data collection and analysis.
- Foster inclusive policy development that reflects the needs of diverse groups, including women, youth, and marginalized communities.

The implementation period of the project is 48 months, and the total budget is 10 mln EUR.

A specific objective of the project is to strengthen the decision-making and planning framework in the green economy domain. This will be achieved by promoting the use of internationally recognized monitoring and evaluation tools, particularly those based on the OECD Green Growth Indicators (GGIs), to assess relevant data and create the necessary foundation for inclusive participation in the green transition.

The Republic of Moldova is committed to advancing its green transition and achieving long-term sustainable economic development, with a focus on reducing greenhouse gas emissions and modernizing key sectors.

In this regard, the Ministry of Environment and the Ministry of Economic Development and Digitalization, as lead institutions, together with line ministries, the National Bureau of Statistics, the Environmental Agency, and research institutions, will use a national set of GGIs to track the implementation of key strategic documents. These include the National Development Strategy 2030, the Environmental Strategy 2030, the Programme for the Promotion of Green and Circular Economy (2024–2028), and the Programme for Entrepreneurship Development and Competitiveness (2023–2027).

Measuring the environmental footprint of economic activities is a key component of the green transformation. The national GGI set, developed based on OECD methodology, provides a robust tool for monitoring progress. These indicators enable Moldova to make evidence-based decisions aligned with its policy priorities on green and circular economy development, pollution reduction, and the decoupling of economic growth from environmental degradation.

To date, the Republic of Moldova has developed and is calculating a set of 43 GGIs, which are included in the national GGI reports.

The first national GGI report was completed and presented in 2017 under the regional programme *Greening Economies in the Eastern Partner Countries (EaP GREEN)*, funded by the European Union and implemented by the OECD in cooperation with the Ministry of Environment, the Ministry of Economy, and the National Bureau of Statistics. This initial report included 33 GGIs, adapted to the national context, and was used to measure the performance of the first Programme for the Promotion of Green Economy (2018–2021).

However, due to changes in government, lack of institutional continuity, and the loss of institutional and human capacities in this area, further progress assessments became necessary. As a result, under the *EU4Environment – Green Economy* regional action, the OECD, together with the Ministry of Environment and the then Ministry of Economy, developed a second report: *Towards Green Transformation of the Republic of Moldova: State of Play for 2021*. This report covered 43 indicators and identified an additional 20 indicators for future development, calculation, and integration into the national framework.

As part of the current Green Transition Project, it is essential to build on the lessons learned from previous reporting by updating and expanding the national GGI report. This activity will assess the potential to broaden the current indicator set by incorporating additional priority GGIs. These new indicators will help provide a more comprehensive understanding of Moldova's status – both nationally and within specific sectors or institutions – in the promotion and implementation of green economy policies.

The updated GGI report will adopt a socio-economic framework and emphasize gender-responsive and inclusive green transition. Through relevant indicators and their analytical interpretation, it will:

- Highlight how capacities and awareness on the green transition have increased among key stakeholders **with attention to gender balance in participation and leadership**;
- Identify whether additional funding has been mobilized by promoting or piloting investments in green and innovative technologies;
- Provide sufficient data for improved evidence-based decision-making, including the application of a reliable air quality monitoring system **that integrates gender-sensitive analysis of environmental health impacts**.

The updated report will also evaluate the response of the business community and society at large to the ongoing challenges of the green transition.

This analysis comes at a critical juncture, as the *new Growth Plan* and Moldova's *EU Accession Agenda* lay the groundwork for implementing measures related to the green transformation. The goal is not only to present statistical data, but also to analyze the drivers behind current trends and identify actionable policy options. The updated GGI report will reflect Moldova's progress in advancing the green economy and highlight priority areas for future interventions.

2. Objective of the assignment

The primary objective of this activity is to support the Republic of Moldova's green transition by strengthening the national framework for monitoring and evaluating green growth and circular economy policies through the development of **inclusive** methodologies, the calculation of new Green Growth Indicators (GGIs), **including gender-sensitive and sex-disaggregated indicators**, and the preparation of the National GGI Report for 2024, thereby enhancing institutional capacity for evidence-based decision-making.

This activity aims to support Moldova's environmental, economic, and statistical institutions in assessing the current status of national green transition policy implementation **with a particular focus on ensuring that the transition is inclusive and equitable**. It will also contribute to strengthening national monitoring and reporting systems, enabling the design and application of more effective, data-driven measures to promote green growth and circular economy objectives.

The outcomes of this activity will provide a solid foundation for informed and inclusive policy development and reporting. By incorporating gender equality as a cross-cutting priority, the activity will help ensure that the benefits of Moldova's green transition are equitably shared and that no one is left behind. The framework and methodologies developed will also have the potential for replication and scaling to advance sustainable and gender-equitable development across key sectors.

To reach the proposed objective, the selected Company/NGO is expected to perform the following tasks:

1. In coordination with the Ministry of Environment (ME), Ministry of Economic Development and Digitalization (MEDD), National Bureau of Statistics (NBS), and the Green Transition (GT) Project, identify and prioritize a set of 20 new Green Growth Indicators (GGIs), in addition to the 43 indicators included in the second National GGIs Report. Specifically, the selected company will:

- Review relevant national policy documents to ensure the newly proposed GGIs are aligned with Moldova's green transition objectives, legal framework, and strategic commitments.
- Conducting a comprehensive gap analysis of Moldova's two previous GGI reports, including of data sources, methodologies, visualization, analytical interpretation of causes and trends and suggesting most relevant policy options, as well as analyze relevant international frameworks and guidance, including those developed by the OECD and examples from EU member states.
- Conduct targeted consultations with ME, MEDD, NBS, EUHLPAM (EU High-Level Adviser on Environment and Green Transition), Ministry of Labor and Social Protection (MLSP), Ministry of Health (MH) and the GT Project team to assess institutional needs and priorities related to the development and calculation of additional GGIs.

- Develop and compile a list of 20 new GGIs that complement the existing indicators and address current policy and data gaps. The new indicators should respond to emerging national priorities, such as green jobs, green SMEs, material productivity, green investments, and green qualifications **while also incorporating gender-sensitive dimensions. This includes ensuring that indicators reflect gender-specific barriers and opportunities in green sectors and support the monitoring of gender equality outcomes within the green transition.**
- Coordinate and validate the proposed list and associated methodologies with ME, MEDD, NBS, MLSP, MH and UNDP (GT Project), and other key stakeholders. The finalized proposal will be presented for discussion and endorsement during a meeting of the Inter-Ministerial Working Group on Green Economy and ESG.

2. Development of Methodologies for Calculating the 20 Newly GGIs:

- Conduct a comprehensive review of international methodologies used for the calculation of GGIs, drawing from relevant sources such as the OECD, ILO, UNECE, and best practices from EU member states.
- Based on this analysis, develop tailored methodologies for each of the 20 newly identified GGIs, ensuring their alignment with Moldova's statistical practices, institutional framework, and national data collection procedures. Where appropriate, adapt international methodologies to fit the Moldovan context.
- Methodologies to be submitted for verification/evaluation and validation to the ME, MEDD, NBS. Approval of the methodologies will follow the internal approval processes, by orders or decisions of the governmental institutions, accordingly.

3. Preparation of the Third National GGIs Report – *Towards Green Transition of the Republic of Moldova: State of Play for 2024* (in Romanian and English), covering a 10-year trend analysis:

- Collaborate closely with the ME, MEDD, NBS, MLSP, MH and the Green Transition Project to collect relevant data, develop the analytical content, and formulate evidence-based policy options.
- Clearly define and indicate all data sources (all officially existing environmental and statistical databases (ME, NBS, EPA, other subdivisions of the ME, MLSP, MH etc.), national annual or biannual analytical reports, statistical reports and international databases and sites (OECD, Eurostat, UNECE etc).
- Calculate and provide detailed analysis for the 20 newly identified and validated GGIs.
- Update and analyze the 43 previously reported GGIs to reflect progress since the last reporting cycle.
- Structure the report in line with the existing format and the OECD-recommended framework, including the following sections:
 - Methodology;
 - Socio-economic context and growth characteristics, **highlight how socio-economic trends affect women and men differently in the context of the green transition;**
 - Environmental and resource productivity of the economy, **where possible, include gender-disaggregated data on labour productivity in green sectors and access to resource-efficient technologies;**
 - The natural asset base;
 - Environmental dimensions of quality of life;
 - Economic opportunities and policy responses;
 - Comparative table of national GGIs for 2017, 2021, and 2024;
 - Glossary of indicators.
- The report will integrate ESG principles and present data within a socio-economic framework to support a gender-responsive and inclusive green transition including support for women-led initiatives and equitable access to financing. It will utilize relevant indicators and analytical interpretation to assess improvements in

awareness and institutional capacity among key stakeholders. Additionally, the report will evaluate whether sufficient additional funding has been mobilized through the promotion and piloting of investments in green and innovative technologies. It will provide robust, disaggregated data to support evidence-based decision-making for the green transition and will reflect the outcomes of consultations with the ME, MEDD, NBS, EUHLPAM, MLSP, MH, and the GT Project team.

- Submit the finalized draft of the GGI Report for evaluation and validation by ME, MEDD, NBS, EUHLPAM, MLSP, MH, and the GT Project team and present the finalized GGIs Report within the meeting of the Inter-Ministerial Working Group on Green Economy and ESG for review, discussion, and formal endorsement.

4. Development and Publication of the Digital Version of the Third National GGIs Report:

- Design and produce a digital version of the third GGIs Report (*Towards Green Transition of the Republic of Moldova: State of Play for 2024*) for wider public access and dissemination.
- In collaboration with the ME and the MEDD ensure the publication of the report on their official websites, following the format and structure of the previous reports Romanian version: <https://mediu.gov.md/indicatori/index.html>, and the English version: <https://mediu.gov.md/indicatori/indexen.html>.

5. Conceptualization and Implementation of a Capacity Building Program to Strengthen Stakeholders' Competences in Developing GGIs Reports, thus enhancing the institutional and technical capacity of key stakeholders (ME, MEDD, NBS, and others) to independently contribute to the development, analysis, and use of Green Growth Indicators (GGIs) in policy planning and reporting:

- Design the concept and structure of the capacity building program, aligned with national green transition objectives and stakeholder needs **while incorporating gender equality as a cross-cutting theme.**
- Identify the target audience (e.g., policymakers, statisticians, analysts from ME, MEDD, NBS, and other relevant institutions), **ensuring gender balance in participation.**
- Coordinate the draft concept with UNDP and national partners (ME, MEDD, NBS) for validation and feedback.
- Develop a detailed agenda covering key thematic areas such as:
 - Overview of GGIs and their relevance to Moldova's policy context
 - Methodologies for calculating and interpreting GGIs
 - Using GGIs for policy development, monitoring, and reporting
 - International best practices (OECD, EU, etc.), **highlighting how other countries have integrated gender into green growth monitoring.**
- Prepare user-friendly and technically sound materials, including presentations, handouts, case studies, and practical exercises **while illustrating gender-differentiated impacts and the value of inclusive data.**
- Organize and conduct the in-person training, ensuring interactive engagement and hands-on experience in GGI data use and analysis.
- Collect participant feedback, **disaggregated by gender**, assess training effectiveness, and provide post-training support materials as needed.

The final output of this activity will be a comprehensive analysis and national GGIs report detailing findings, data both tendencies/trends/charts and their interpretation.
