37. Post-qualification/ DueDiligence	UNDP reserves the right to undertake a post-qualification assessment, aimed at determining, to its satisfaction, the validity of the information provided by the proposer. Such exercise shall be fully documented and may include, but need not be limited to, all or any combination of the following: a) Verification of accuracy, correctness and authenticity of information provided by the proposer; b) Validation of extent of compliance to the RFP requirements and evaluation criteria based on what has so far been found by the evaluation team; c) Inquiry and reference checking with Government entities with jurisdiction on the proposer, or with previous clients, or any other entity that may have done business with the proposer; d) Inquiry and reference checking with previous clients on the performance on on-going or completed contracts, including physical inspections of previous works, as deemed necessary; e) Physical inspection of the proposer's offices, branches or other places where business transpires, with or without notice to the proposer; f) Other means that UNDP may deem appropriate, at any stage within the selection process, prior to awarding the contract.
38. Clarification of proposals	UNDP may request clarification or further information in writing from the proposers at any time during the evaluation process. The proposers' responses shall not contain any changes regarding the substance or price of the proposal, except to confirm the correction of arithmetic errors discovered by UNDP in the evaluation of the proposals, in accordance with Instructions to Proposers Article 23 (Errors or omissions).

	UNDP may use such information in interpreting and evaluating the relevant proposal but is under no obligation to take it into account. Any unsolicited clarification submitted by a proposer in respect to its proposal which is not a response to a request by UNDP, shall not be considered during the review and evaluation of the proposals.
39. Responsiveness of proposal	UNDP's determination of a proposal's responsiveness is to be based on the contents of the proposal itself. A substantially responsive proposal is one that conforms to all the terms, conditions, TOR and other requirements of the RFP without material deviation, reservation, or omission. A material deviation, reservation, or omission is one that: a) affects in any substantial way the scope, quality, or performance of the services specified in the contract; or b) limits in any substantial way, inconsistent with the solicitation documents, UNDP's rights or the proposer's obligations under the contract; or c) if rectified would unfairly affect the competitive position of other proposers presenting substantially responsive proposals. 40. Nonconformities, reparable errors and omission	Provided that a proposal is substantially responsive, UNDP may waive any non-conformities or omissions in the proposal that, in the opinion of UNDP, do not constitute a material deviation. Provided that a proposal is substantially responsive UNDP may request the proposer to submit the necessary information or documentation, within a reasonable period, to rectify nonmaterial nonconformities or omissions in the proposal related to documentation requirements. Such omission shall not be related to any aspect of the price of the proposal. Failure of the proposer to comply with the request may result in the rejection of its proposal. For financial proposals that have been opened, UNDP shall check, and correct arithmetical errors as follows: a) if there is a discrepancy between the unit price and the line-item total that is obtained by multiplying the unit price by the quantity, the unit price shall prevail and the line-item total shall be corrected, unless in the opinion of UNDP there is an obvious misplacement of the decimal point in the unit price; in which case, the line item total as quoted shall govern and the unit price shall be corrected; b) if there is an error in a total corresponding to the addition or subtraction of subtotals, the subtotals shall prevail, and the total shall be corrected; and c) if there is a discrepancy between words and figures, the amount in wordsshall prevail, unless the amount expressed in words is related to an arithmetic error, in which case the amount in figures shall prevail. If the proposer does not accept the correction of errors, its proposal shall be rejected, and its proposal security may be forfeited.
41. Right to accept any proposal and to reject any or all proposals	UNDP reserves the right to accept or reject any proposals, and to annul the proposal process and reject all proposals at any time prior to contract award, without thereby incurring any liability to the affected proposer or proposers or any obligation to inform the affected proposer or proposers of the grounds for UNDP's action. SECTION 5. TERMS OF REFERENCE

Company/NGO to develop and carry out two editions of Green Pre-acceleration Program

a. Background Information and Rationale, Project Description

On 23rd of June 2022, the European Council granted the Republic of Moldova the status of EU candidate country which is a substantial achievement, but which comes with great responsibilities and obligations. One of such obligations is the “Green Agenda and Sustainable Connectivity” which includes Chapters of the environment and climate change acquis. In this sense, meaningful reform is expected in view of European Green Deal targets.

The Green Transition Project takes due account of this endeavor. Hence, it will put in place the enabling conditions for a green transformation in Moldova through a combination of cross-sectorial decision-making in joint stakeholder platforms, capacity building measures, general education and awareness raising, dissemination of best policy practices, information sharing and networking, as well as pilot-testing green-transition related solutions and other activities, to ensure that the green transition concept is well understood and implemented.

The established enabling conditions and investments into green-transition solutions will respond to the key development challenges that the country is currently dealing with, such as climate change, environmental pollution, and the energy crisis.

It is well acknowledged that Moldova is highly vulnerable to climate change, given the limited resources and institutional capacities to address the climate change impacts. It is also due to the heavy reliance on the agricultural sector, water scarcity, and other geographical factors. Currently the country is advancing with the national adaptation planning, including in the agricultural sector, aimed at putting in place proper institutional, technical, and budgeting capacities in the context of climate change, however significant gaps remain in embarking of the sectors into achievement of the long-term adaptation targets.

Environmental degradation is also posing a major threat to Moldova’s development agenda as its economy relies greatly on natural resources which leads to their overexploitation and pollution. Inadequate waste management practices and outdated practices and technologies in the key sectors of the economy also contribute to environmental degradation and pollution. Mainstreaming of the green agenda into the country’s economic activities is taking place slowly.

Moldova is in line with the global trend of continuously growing urbanization, with the proportion of the population living in urban areas expected to rise from 47% in 2010 to 60% in 2030 (UN Habitat). Cities are increasingly and significantly contributing to the main drivers of global environmental degradation. The municipalities have the greatest impact on air quality and are responsible for more than 50% of total air pollution in Moldova.

From energy security perspective – Moldova is highly dependent on imported energy sources and rely mostly on the use of fossil fuels. In addition, inefficient energy supply and consumption across all sectors exacerbates the situation. Until recently being 100% dependent on Russian gas import, the country is actively seeking diversification of energy supplies after the war of aggression in Ukraine. Improvements both in energy efficiency and in the development of domestic resources – including renewable energy resources – for strengthened sustainability, competitiveness, and energy security rank high on the political agenda. Energy sector and also the main source of GHG emissions in the country.

Against this background, the Green Transition Project aims to support the Government of Moldova to engage sustainably in a transformative green agenda by enhancing awareness, building capacities, and encouraging investments into low-emission and resource efficient economy.

The target areas of the project are resource efficiency, green and circular economy, cleaner and sustainable energy, and mobility.

The Project is to be implemented under the following three specific components:

1. Socio-economic framework for gender-responsive and inclusive green transition enabled.
2. Capacity and awareness of the inclusive green transition increased among key stakeholders.
3. Additional funding attracted by promoting and piloting investments in green and innovative technologies, while evidence-based decision-making for green transition is improved by deploying a reliable air quality monitoring system.

The implementation period of the project is 48 months, and the total budget is 10 mln EUR.

The Republic of Moldova has committed to advancing its green development agenda as a cornerstone of its European Union (EU) candidacy efforts. These commitments are enshrined in the Association Agreement with the EU, which emphasizes sustainable development and the promotion of a green economy. This strategic alignment underscores Moldova's determination to implement transformative reforms in environmental governance and sustainability, ensuring progress toward a resilient and inclusive future.

The Green Transition Project is a key initiative supporting Moldova's green ambitions, focusing on five interrelated thematic areas:

- **Waste Management, Circularity and Eco-innovation**
- **Green and Sustainable Mobility**
- **Environmental, Social, and Governance (ESG) Framework**
- **Green Financing**
- **Resource Efficiency**
- **Sustainable Business Model Development**
- **Capacity Building on Green transition**

To ensure the successful implementation of its objectives, the project seeks to encourage partnerships and foster cooperation among a broad spectrum of stakeholders, including public authorities, private sector actors, civil society, and the general population. Effective collaboration is vital for driving impactful and inclusive interventions across thematic areas.

The Republic of Moldova is committed to advancing its green transition and achieving long-term sustainable economic development, with a focus on reducing greenhouse gas emissions and modernizing key sectors. Component 3 of the Green Transition Project aims to build on the enabling conditions established in previous components, channelling investments into green technologies and innovative solutions to drive economic growth. The specific goal of this component is to attract additional private investments into green and eco-innovative projects, with a focus on resource efficiency, circular economy practices, low-carbon energy technologies, and environmental monitoring. This will be achieved through promoting best practices and smart financing programs targeting SMEs, public-private partnerships, and business support organizations. Priority will be given to initiatives led by women and young entrepreneurs, fostering inclusive participation in the green transition.

By the end of Component 3, the goal is to attract at least 1,000,000 EUR in additional private investments while promoting sustainable development practices across Moldova's economy. Key interventions will focus on enhancing resource efficiency, reducing carbon footprints, and creating business models that are environmentally and economically sustainable, aligning Moldova's efforts with the European Green Deal and EU sustainability goals.

The urgency to accelerate the green transition and shift to a more sustainable development path has become evident. Jobs have been lost, and financial losses have occurred in all economic sectors. This has led to private sector actors, particularly women, no longer having the means and motivation to engage in environmentally friendly practices. In order not to lose interconnected revenue streams and incomes, it is important to support these actors in becoming the agents of change to make the green transition a reality.

Moreover, the Green Transition project is advancing efforts to build a climate-resilient, low-emissions, and environmentally sustainable economy in Moldova. One of its strategic interventions focuses on fostering green entrepreneurship and innovation as a key driver for sustainable economic growth.

Special emphasis will be placed on integrating Gender Equality and Women's Empowerment (GEWE) into all aspects of the programme. This will involve identifying gender-specific gaps and opportunities, ensuring that women and underrepresented groups have equitable access to training, resources, and decision-making processes. The programme will promote gender-sensitive approaches to capacity-building, recognizing the essential role of inclusivity in fostering a truly sustainable green transition.

To this end, the Project will support the design and implementation of two editions of **Green Pre-Acceleration Program**, which aim to empower early-stage entrepreneurs and students to develop innovative, sustainable, and climate-smart solutions. The program will provide a dynamic environment for participants to ideate, validate, and begin developing ventures that contribute to Moldova's green transition and support systemic environmental change, at the same time advancing Gender Equality and Women's Empowerment (GEWE) principles.

The first edition will take place in **autumn 2025**, followed by the second edition in **spring 2026**. The latter will be delivered in a hybrid format, combining in-person and online activities across Chisinau, Cahul, and Balti, and will include online sessions and tools to ensure broader access and inclusion.
