Section 3a: Schedule of Requirements and Technical Specifications

1. Background Information

The overall objective of the Support to Confidence Building Measures” Programme (the SCBM Programme) is to contribute to an environment of trust and cooperation across the Nistru/Dniestr River generating new perspectives on shared interests and a shared future for people from both banks of the river while responding to their pressing development needs. The SCBM Programme represents a framework for engaging in development interventions across the security zone on both sides of the Nistru/Dniestr River, comprising a series of activities that strengthen, regularize and intensify interaction between otherwise divided societies, aiming to establish this interaction as a norm.

SCBM Programme consists from two main components: Business Development Project and Empowered Communities and infrastructure support Project.

Under the Empowered communities and infrastructure support Component, the SCBM Programme aims to address barriers to cooperation by building the trust and broadening opportunities for engaging a wide range of actors. At least 60 local actors will increase their capacities to promote sustainable and inclusive development, while 30 social infrastructure projects will be implemented in the security zone on both banks of the river, also promoting people-to-people contacts and cross-river exchanges. Projects will focus on the rehabilitation of key social institutions (such as education, health facilities), and improvements to critical physical infrastructure (such as transportation, water supply, sewage networks and waste management).

In order to ensure a tangible impact, the programme will provide support to medium-sized infrastructural projects. About 100,000 women and men are expected to directly benefit from the implementation of the programme.

Expected results from the above outlined activities are twofold. From one hand, they will contribute to the increase of the capacity of target communities to plan better in a more transparent, inclusive and accountable manner by involving most vulnerable members of their communities, considering people’ needs in local participation processes. From another hand, building in local ownership, will bring longer-term sustainability and community engagement in confidence building activities.

During June – July 2016 the SCBM Programme organized an open call for proposals. Based on conducted competitions, 5 Project Proposals were selected for implementation. The UNDP Moldova has developed necessary Bills of Quantities for the implementation of the proposed infrastructural projects.
