Company to deliver quality assurance services for the implementation of the e-Parliament Information System

- A. Project Title "Strengthening Parliamentary Governance in Moldova"
- B. Project Description

The UNDP "Strengthening Parliamentary Governance in Moldova" (SPGM) Programme works with the Parliament of the Republic of Moldova (PRM) to strengthen its law-making, oversight and representation functions with a specific focus on EU integration and the Sustainable Development Goals. The programme directly assists standing committees and the secretariat of parliament in the implementation of their mandate. Interventions include training, technical assistance, easy-to-read publications, exchanges and opportunities for learning from other parliaments, as well as the provision of specialized technical equipment.

At the request of the parliament, UNDP Moldova has initiated the procurement of an *off-the-shelf* software platform for the implementation of an e-Parliament information system, in accordance with Permanent Bureau Decision No. 19 of 18 November 2015. The scope of the project is the delivery of an integrated system consisting of three components:

- Document management system (DMS)
- Electronic voting sub-system
- Public web portal

In line with the approved concept, the goal of implementing the e-Parliament system is to follow the global trend of establishing an information society to strengthen the democratic process. By implementing the e-Parliament system, the legislature will apply modern technologies and standards in support of its core functions:

- Representative function. The representative function of the PRM is characterized by its role as a venue for disparate perspectives, for the expression and debate of issues of local and national importance, and the translation of those debates into policies. For MPs, effective representation requires engaging their constituents in continuing dialogue to understand their views and perspectives and to rely on their knowledge on various topics.
- **Legislative function**. A central role of parliament is to make new laws, as well as making changes to existing legislation. Draft laws are introduced by government or individual members of parliament. After review by the relevant parliamentary committee, the draft laws or bills are discussed and voted on in the plenary for adoption.

Oversight function. Parliamentary oversight aims to promote people's freedoms and well-being, and to improve accountability and transparency in government. Oversight processes assess the impact of government action on society; help ensure that appropriate resources are provided to implement government programmes; identify unintended or negative effects of government policy and actions; and monitor the meeting of national and international commitments.

Overall, the implementation of e-Parliament will change the PRM's work processes through a standardization of many of its business processes. Additionally, the e-Parliament system is expected to increase parliamentary transparency and visibility through the introduction of a new and improved public web portal.

In this context, UNDP is looking to contract a company to deliver quality assurance services during the implementation of the e-Parliament Information System. The company will have to certify that the offered e-Parliament IT solution is in line with the announced Technical Specifications, assisting in software and security testing of e-parliament IS, as well as advising on acceptance of implemented e-Parliament IT solution.
