Section 5. Terms of Reference: Development of detailed Technical Design and Cost Estimates for 4 small scale cultural heritage sites (4 LOTs) located on the left bank of Nistru River

General Background:

In 2019 the European Union Confidence Building Measures Programme launched its fifth phase of the programme funded by the European Union and implemented by the UNDP Moldova. The overall goal of the Program is to increase confidence between both banks of the Nistru River by ensuring socio-economic development through involvement of local authorities, civil society organizations, private actors, and other community stakeholders.

The EU CBM Programme consists of 4 specific components: promoting business development; support to community development and cross river platforms of cooperation; preserving cultural and historical heritage and assistance to media development and cooperation.

Culture is essential for the development of any society. Culture may have a strong dynamic and transformative force for social transformation on both banks. The activities under this component will provide support to the cultural sector with a focus on historical heritage with a view to investing in the country's future and facilitating development and conflict settlement.

Cultural and Historical heritage component focuses on conservation-restoration of historical monuments of national importance and on conservation-restoration of smaller scale historical heritage endangered projects, which are considered to have a national interest for both banks (Confidence building measures dimension).

As a result of an open competition, held in 2020, out of 256 ideas, 10 small scale cultural heritage sites located on both banks of the Nistru River were selected for future implementation. Four of them are cultural heritage sites located on left bank of the Nistru river that require development of detailed design documentation for conservation/restoration works - Ruins of the church of Rascov village, Camenca district, Wind tower in Stroenti village, Ribnita district, Watermill in Beloci village, Ribnita district and Bender Higher Art College (Auditorium), Bender. All listed sites are included in the List of Heritage Sites of Transdnistria.

A. SCOPE OF WORK

The European Union Confidence Building Measures Programme (hereinafter the EU-CBM V Programme) is looking for one or several local technical design companies with experience in development of detailed technical design for conservation/restoration works of Cultural Heritage sites, to provide services in respect of developing design documentation, bill of quantities, cost estimates and provide author supervision of the 4 above-mentioned small scale cultural heritage sites located on the left bank of the Nistru River.

To achieve the objective of this assignment, the appointed company/companies will be responsible to carry out all detailed technical design related works, including obtaining the permissive technical documentation (drawings, urbanism certificates, technical conditions for getting connected to the technical and utility networks), drafting, coordinating and endorsing the design documentation and specifications, as established in the legislation in force and organizing author's supervision activities.

Based on the technical documentation and specifications (estimates) drafted by the company, a tender will be launched, aiming at selecting the entrepreneurs that will carry out the conservation/restauration works at all 4 small scale cultural heritage sites.

The volume of design work must correspond to the amount spent on design and construction work of 40,000 euros for each cultural heritage site.
