This RFP is conducted in accordance with the UNDP Programme and Operations Policies and Procedures (POPP) on Contracts and Procurement which can be accessed at <a href="https://popp.undp.org/SitePages/POPPBSUnit.aspx?TermID=254a9f96-b883-476a-8ef8-e81f93a2b38d">https://popp.undp.org/SitePages/POPPBSUnit.aspx?TermID=254a9f96-b883-476a-8ef8-e81f93a2b38d</a>
	1.2	Any Proposal submitted will be regarded as an offer by the Bidder and does not constitute or imply the acceptance of the Proposal by UNDP. UNDP is under no obligation to award a contract to any Bidder as a result of this RFP.
	1.3	As part of the bid, it is desired that the Bidder registers at the United Nations Global Marketplace (UNGM) website ( <a href="www.ungm.org">www.ungm.org</a> ). The Bidder may still submit a bid even if not registered with the UNGM. However, if the Bidder is selected for contract award, the Bidder must register on the UNGM prior to contract signature.
2. Fraud & Corruption, Gifts and Hospitality	2.1	UNDP strictly enforces a policy of zero tolerance on proscribed practices, including fraud, corruption, collusion, unethical or unprofessional practices, and obstruction of UNDP vendors and requires all bidders/vendors observe the highest standard of ethics during the procurement process and contract implementation. UNDP's Anti-Fraud Policy can be found at <a href="http://www.undp.org/content/undp/en/home/operations/accountability/audit/office_of_audit_andinvestigation.html#anti">http://www.undp.org/content/undp/en/home/operations/accountability/audit/office_of_audit_andinvestigation.html#anti</a>
	2.2	Bidders/vendors shall not offer gifts or hospitality of any kind to UNDP staff members including recreational trips to sporting or cultural events, theme parks or offers of holidays, transportation, or invitations to extravagant lunches or dinners.

<b>Duty station:</b>	Chisinau, Moldova
Reference to the project:	"Sustainable and resilient communities through women empowerment" (in short "ResComWomEmp")
Contract type:	Professional services
Expected duration of the assignment:	September 2021 – December 2022

#### I. BACKGROUND

Republic of Moldova is facing many significant environmental issues triggered mainly by the unsustainable use of natural resources and agricultural practices. As a result, there is continuous degradation and loss of fertile land and biodiversity and air and water pollution from point and non-point sources due to high motorization and dumping of waste and chemicals. All these along with the pending climate change risks directly and indirectly affect the living conditions and health of the population, and especially of women, as well as the economic development of the country, contributing to further increase in poverty, especially in rural areas.

In Moldova, the poverty rate is 7.5 times higher in rural areas than in large cities. Since a significant part of the rural population is engaged in subsistence agricultural activities, the risk of falling below the poverty line is high in years of climate-related extreme events. Rural population is increasingly vulnerable to climate change impacts2, especially women and women-led households, who are not able to provide resources and services needed to ensure water, food, and energy supply for their families3. Moreover, rural poor have limited knowledge regarding the sustainable and environment-friendly agricultural and forestry practices that would increase adaptation and resilience capacities of communities and ecosystems.

The **objective of the project** is to build inclusive, sustainable, and resilient communities and create an enabling environment for women's economic, social and educational empowerment. The project's objective will be achieved through **four outcomes**:

- Sustainable, climate resilient and environmentally-sound livelihoods defined and local capacities & knowledge on environment, climate change and gender enhanced and implemented successfully;
- NGOs capacities to provide expertise to LPAs and women in the field of resilience to climate change, sustainable development and gender mainstreaming;
- 3. Environment-friendly and climate resilient practices and projects implemented by women headed households, women agri-producers and communities;
- 4. Sustainable and climate resilient practices and business models disseminated and replicated.

The overarching **strategy of the project** is to build sustainable and inclusive resilient communities through empowering women to practice alternative livelihoods in the context of increased environmental degradation and vulnerabilities to extreme weather patterns. By shifting the focus from vulnerability to empowerment,

<sup>&</sup>lt;sup>2</sup> 3<sup>rd</sup> National Communication under the United Nations Framework Convention on Climate Change

<sup>&</sup>lt;sup>3</sup> Gender Equality Strategy of Moldova 2017-2021

adaptation responses have the potential to transform into gender equality opportunities. Such an approach would overturn gender stereotypes, compounded by social and cultural norms, and will empower women to become agents of change.

Overall, the project is carried out in 4 target districts (Nisporeni, Calarasi, Basarabeasca, Leova), the Autonomous Territorial Unit (ATU) Gagauzia, the Security Zone and Transnistria region.

The project is implemented by the United Nations Development Programme (UNDP) during March 2020 – March 2023 with the financial support of the Swedish International Development Cooperation Agency (SIDA). For a complete description of the project scope and planned interventions, please consult the project document available here <a href="https://www.md.undp.org/content/moldova/en/home/projects/sustainable-resilient-communities-through-women-empowerment.html">https://www.md.undp.org/content/moldova/en/home/projects/sustainable-resilient-communities-through-women-empowerment.html</a>

#### **Key project interventions**

The current district-level development strategies do not reflect sufficiently the linkage between the environment protection, climate change risks and gender which in the absence of response measures impede sustainable and resilient livelihoods. The project will support mainstreaming of environmental protection and climate change adaptation solutions into local development policies of the Local Public Authorities from the pilot districts of the project. The climate responsive local development strategies will be further screened through gender lens and the focus on women's needs and capabilities will be reinforced. The mainstreaming process will widely involve various stakeholders ranging from LPAs, private sector, local communities including women and vulnerable groups, into policy and decision-making over priorities that affect their well-being.

Based on the legal analysis and research and hands on experience gained during the mainstreaming process, a proper **capacity building programme on environmental and climate-related legislation for LPAs** will be designed and implemented. The capacity building programme will envisage mentoring and coaching activities as wells as workshops, trainings intended to enhance the capacity of the LPAs to plan and manage in a resilient manner the local natural capital.

Considering the important role played by the **civil society organizations and NGOs** in advancing the 'green agenda' forward and influencing relevant policies, the project will provide dedicated institutional capacity development support to 6 Environmental NGOs, along with an extensive capacity building program to all interested environmental NGOs from the country, but in particular the NGOs located in the or adjacent to the 6 target regions of the Project, on climate change, environmental and gender topics. The project will strive to support regional NGOs to strengthen their capacities to engage in local environmental and climate actions, natural resources management and decision-making.

At community level, the project will contribute to the sustainable development and increased resilience to climate change of **30 communities** (around 60,000-75,000 persons comprising 20,000 to 25,000 households) from the 6 target districts/regions by building their environmental management and adaptive capacities to climate change and supporting environment-friendly and climate resilient income generation activities with the highest potential. The project will directly strengthen the adaptive capacity and reduce the vulnerability of up to **60 women headed households** (450-600 persons-indirectly) and **10 women led agriculture enterprises** (150-200 persons-indirectly) from the 6 target districts/regions by supporting climate-smart agripractices, animal husbandry, and other related activities that would contribute to food security and income generation regardless of the changes in the rainfall patterns and extreme weather events. The replication potential of successful climate resilient practices of the pilot models and capacity development measures

would indirectly benefit the entire population of the 6 districts/regions with further impacts on the other districts.

The project will also **engage with men agri-entrepreneurs**, alongside women, in building their critical environmental management and adaptation knowledge and skills required to advance the sustainable development of their communities.

#### II. SCOPE OF WORK

The aim of the ResComWomEmp project is to support the target areas to boost their socio-economic development with a focus on women's economic, social, and educational empowerment, and to promote the environmental sustainability at the community level. To achieve these goals, the ResComWomEmp project aims, among others, to support women-headed households to pilot environment-friendly and climate change resilient practices in agriculture and other areas aligned with their economic and social needs. Environmental NGOs are expected to be engaged in providing on-the ground support in the form of mentoring and coaching to the women-headed households which will be selected under this assignment.

In this respect, the ResComWomEmp project is looking to engage a **company/organization, or consortium of companies/organizations to support women-headed households in 4 target districts (Nisporeni, Calarasi, Basarabeasca, Leova), ATU Gagauzia, the Security Zone and Transnistria region through a <b>non-refundable non-cash support mechanism**, which includes procurement of equipment/goods/works/services, coupled with coaching, mentoring, consulting, awareness raising and promotion activities, to stimulate environment-friendly, climate resilient and income-generating agripractices at local level. This support will be provided based on clear methodology and selection criteria, innovation inclusively.

The **key objective of this initiative** is to provide comprehensive support (non-cash assistance and capacity building) to women-headed households to promote climate-smart agri-practices that would contribute to food security at the household level and income generation regardless of the changes in the rainfall patterns and extreme weather events.

The **main activities** to be covered under this assignment cumulatively for all target districts and regions are as follows:

1. Support women-headed households in strengthening their climate resilience capacities – to address the local agricultural vulnerabilities to climate change and expand livelihood opportunities, by co-financing environment-friendly and climate resilient practices and initiatives (e.g. rainwater collection, greenhouses construction, drip irrigation, organic waste management, bee keeping, animal husbandry, seeds and goods storages etc.).

This activity includes the following type of support to be offered during 2021-2022:

- **1.1. Support potential grantees in the preparation of grant applications** to enable a larger number of potential beneficiaries to submit competitive applications through extensive consulting and other supportive measures.
- **1.2. Select and provide non-cash support to 60 women-headed households** through the procurement of equipment/goods/works/ services <u>up to 3,500 USD per household.</u>
- **2.** Engage environmental NGOs in coaching and mentoring of women beneficiaries to provide soft support to the selected women-headed households.

This activity includes the following type of support to be offered during 2021-2022:

2.1. **Select and engage 3 environmental NGOs in the mentoring and coaching of womenheaded households** by providing grants <u>up to 30,000 USD to all NGOs</u> covering the entire period (i.e. 2021-2022).

For reaching these goals, ResComWomEmp project follows the idea that women-headed households are to be supported in employing environment-friendly and climate resilient practices through income generating non-cash support scheme and extensive training, consulting, coaching and mentorship - starting with the grant application process and throughout the implementation of selected sub-projects.

The multi-faceted support envisaged under this assignment will offer possibilities for women to promote environmental sustainability in their communities, on one hand, while enhancing the economic security and climate resilience capacities of their particular household and its dependants, if any. At the same time, the present initiative is innovative and unique as it brings on board NGOs to work together with beneficiaries piloting climate resilient practices locally, ultimately also contributing to enhancing their capacities be directly engaged in.
